Dear Manager

Do you have any interest on **Solar powered Lighting**, wall mounted version?

Motion Sensor Wall Mount Solar Light Create a novel and interesting atmosphere in your garden! Perfect for accenting decks, garage and borders at night.

This solar outdoor light is multifunctional. It can be mounted on the wall or around the front door. You can also bring it to have a picnic.

Its infrared sensors (PIR) detect subtle temperature changes caused by movement of people within the selected area of protection.

When instant motion is detected, the lights turn on automatically. When the motion stops, the light stays on for approx 30 seconds. It could automatically light on in the evening for 8 hours!

Make a difference today using solar powered lights.

If any interest, please donot hesitate to contact us for more

Mia
