Hello,

How are you ?

We are manufacturer of **Solar Power Lighting System** .

If you are interested,I'm glad to send you the complete price list.

The advertisement banner features a blue header with the text "Solar System" in white. Below the header, on the left, is a large image of a white and black solar power station with a solar panel attached. To the right of the station, the text "All in one DIY design, easy to carry!" is displayed. Below this text are four circular icons: a solar panel labeled "solar panel", a mobile phone labeled "mobile phone charger", the solar power station labeled "solar system", and an LED light bulb labeled "LED Light". The background of the banner shows a green landscape with a path and a large solar panel in the foreground. At the bottom of the banner is a blue bar containing six white-bordered boxes, each containing an image of a different device: the solar power station, an LED light bulb, a mobile phone, a fan, a camera, and a flashlight.

Best regards,  
Arthur Zhou
